

# National SAM Innovation Project

End of Year SAM Team Performance Report, July, 2025

## Overview

The SAM process® is a set of professional development steps using a unique set of tools to change a school leader's focus from school management tasks to instructional leadership activities *directly connected to improving teaching and learning.*

Increasing instructional time is a step in the SAM process, not its purpose. The purpose is to increase the positive impact the leader has on teaching and learning.

SAM leaders use rubrics and TimeTrack data to assess where they are in the process...everything leads to this question: *Can you connect time spent with an individual, group or project with improved practice/outcomes?* This question is the same whether the user is a principal, assistant principal, instructional coach or counselor.

External and independent studies conclude that principals, and other school leaders who use the process, significantly increase instructional time and their positive impact on teaching and learning. Currently, over 700 school leaders in twenty-two states contract for SAM services.

## Annual Rubric Assessment

The annual *SAM Team Performance Rubric Assessment* is completed each year by the Time Change Coach and each school leader engaged in the SAM process. At the end of the 2024-25 school year, there were 858 active TimeTrack users. Excluded from the assessment were 73 NSIP Time Change Coaches, trainers and administrative staff and 14 users still in the implementation phase. A total of 771 TimeTrack users participated in the annual assessment representing a 100% completion rate.

This report is presented in three sections:

- 2024-25 Assessment Results: Pages 1-21
- Comparison, School years 2021-22, 2022-23, 2023-24, 2024-25: Pages 22-28
- Comments: TimeTrack users, SAMs, Time Change Coaches: (Addendum, online)

---

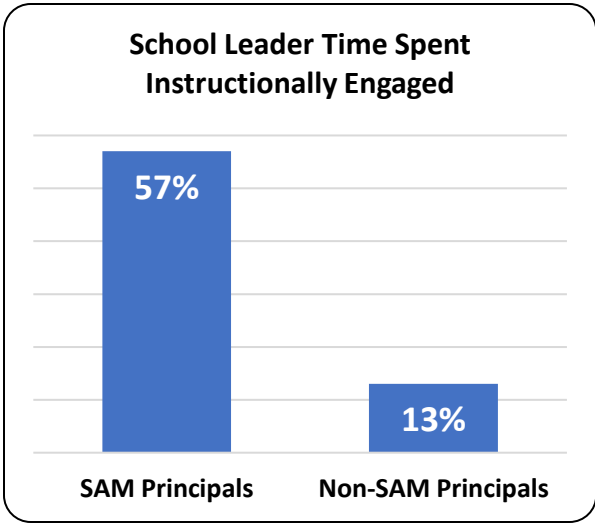

*TimeTrack has been a life changer. It has made me visually conscious about which teachers I need to observe, which teachers need feedback, and which teachers I need to follow up with to see the implementation of the feedback shared. With TimeTrack, I can ensure feedback is scheduled and I am able to prepare for quality feedback for my teachers. Additionally, I can determine additional supports I need to schedule time for in order to ensure the quality of teacher feedback is high leverage.*

*~Jasmira Caceres, Principal, PS/MS 161, New York City, New York*

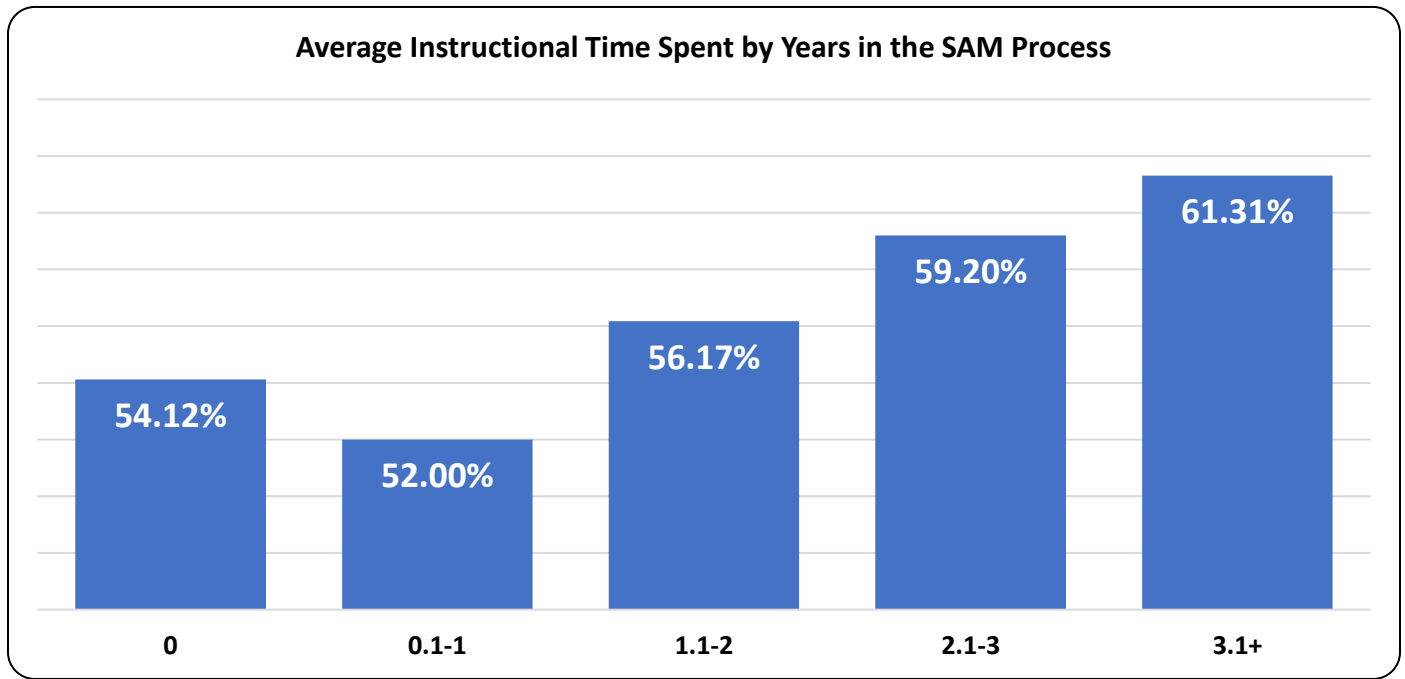

---

## Instructional Focus and Intentionality

*School leaders using the SAM process spend the majority of their time on instructional activities intended to improve teacher practice and student learning.* Data from the annual SAM Team Performance Rubric Assessment and TimeTrack records demonstrate SAM principals spent 57% of their time instructionally engaged during the 2024-25 school year. The longer a SAM principal participates in the process, the higher the instructional time. Leaders who have advanced to the highest performance level spend 73% of their time instructionally engaged.

National studies have determined principals *who do not do the SAM process* spend between 13% and 25% of their time instructionally engaged. (Grissom, Loeb, & Master, 2013, PSA, 2011)

---

*I value TimeTrack because it allows me flexibility in my schedule. It frees up my mental space to schedule and complete tasks. It is my to do list. It allows me to focus on the work, not scheduling the work. Determining what I need to do next or rescheduling an event that didn't happen is right there!*

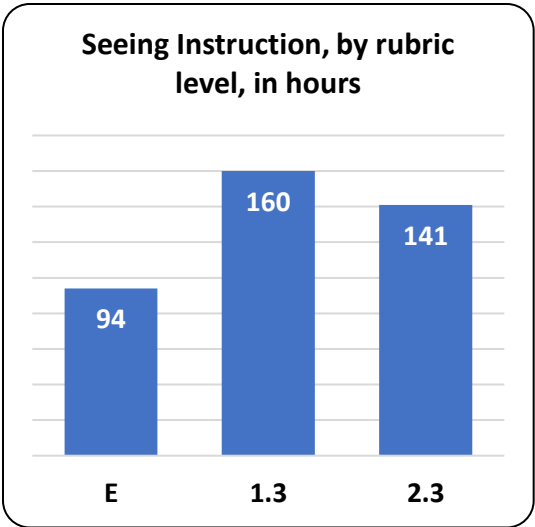

*~Julie Jay, interventionist, PS 249 The Caton School, NYC #17, Brooklyn, New York*

---

## Seeing Instruction

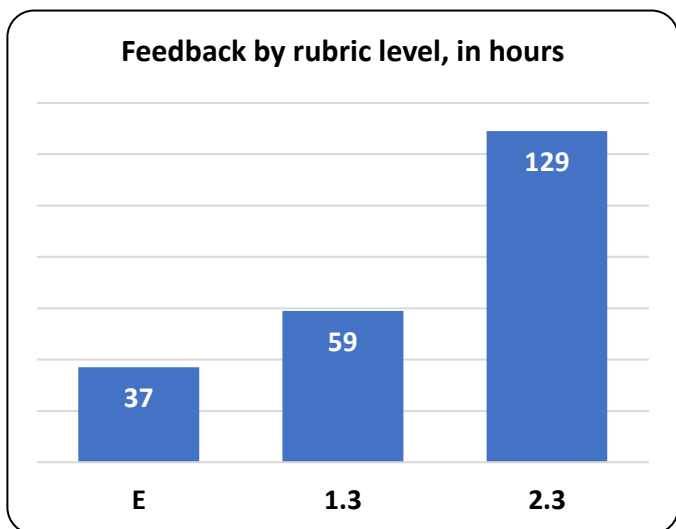

What people see the principal do each day demonstrates what that principal really cares about. Education leadership author Danny Steele says it this way, “I don’t care what your personal mission statement says. Everyone in the building knows what you’re about by how you spend your time.”

Data from the annual SAM Team Performance Rubric Assessment demonstrates that principals who do the SAMs process spent 12% of their time seeing instruction, averaging 129 hours each school year, *more than twice the time of non-SAM principals*. The amount of time seeing instruction increases each year the leader does the SAM process.

## Feedback

A study conducted by The New Teacher Project, TNTP, reported 75% of teachers could not recall receiving any specific feedback from their principal on how to improve their instructional practice. Feedback, defined in the SAM process as conversation with a teacher about instructional practice, is measured daily by TimeTrack.

The annual SAM Team Performance Rubric Assessment process for the 2024-25 school year demonstrates that principals who do the SAM process spent 5.4% of their time providing feedback, averaging 53 hours each school year, *more than three times the amount of non-SAM principals*.

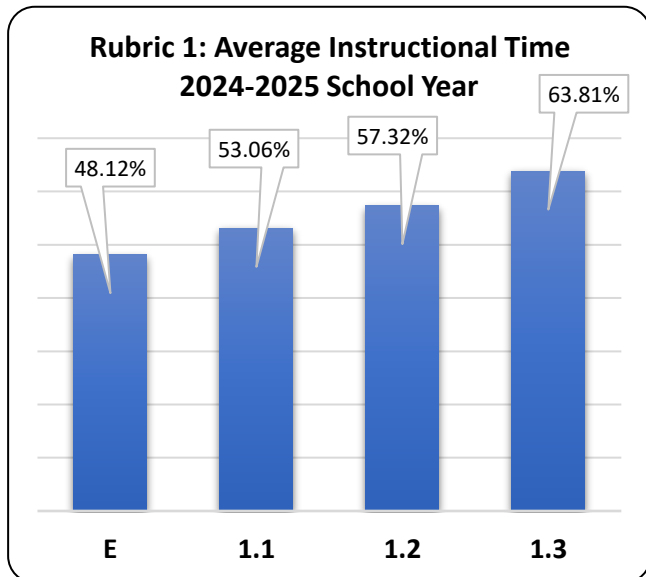

NSIP separates feedback into two categories: conversation and written. Conversation Feedback is coded by type: Directive, when the principal tells a teacher what to do; Non-directive, when a principal facilitates a conversation and encourages the teacher to explore and reflect; and Celebratory, when the principal engages the teacher in a conversation about a successful practice. NSIP views all four kinds of feedback as necessary and important. Interestingly, the longer a principal engages in the SAM process the more Non-directive feedback is provided.

## NSIP Rubrics

NSIP uses three sequential rubrics to guide SAM teams and TimeTrack users. Each rubric, and rubric level represents a higher degree of sophistication and efficacy in using time data to improve leader performance in assisting in the improvement of teaching and learning. Each rubric has four levels.

| Instructional Time by Rubric Level                               |                       |
|--|-----------------------|
| Rubric 1   | 2024-2025 School Year |
| E (Is still working to master all elements of Rubric 1, level 1) | 48.12%                |
| 1.1 (Has mastered all elements of Rubric 1, level 1)             | 53.06%                |
| 1.2 (Has mastered all elements of Rubric 1, level 2)             | 57.32%                |
| 1.3 (Has mastered all elements of Rubric 1, level 3)             | 63.81%                |

| Rubric 2  | 2024-2025 School Year |
|---|-----------------------|
| 2.0 (Still working to master all elements of Rubric 2, level 1) | 61.22%                |
| 2.1 (Has mastered all elements of Rubric 2, level 1)            | 64.41%                |
| 2.2 (Has mastered all elements of Rubric 2, level 2)            | 68.28%                |
| 2.3 (Has mastered all elements of Rubric 2, level 3)            | 73.47%                |

---

*I love my TimeTrack. It has helped me become a more focused instructional coach. It has helped me identify which teachers I need to spend more time with and has allowed me to make more of a widespread impact across the building. Comparing data with others as merged data allows means we recognize individuals who need more support. I couldn't do this without SAM.*

*~Alice Fuglsang, instructional coach, Indian Hills Jr. High School, West Des Moines, Iowa*

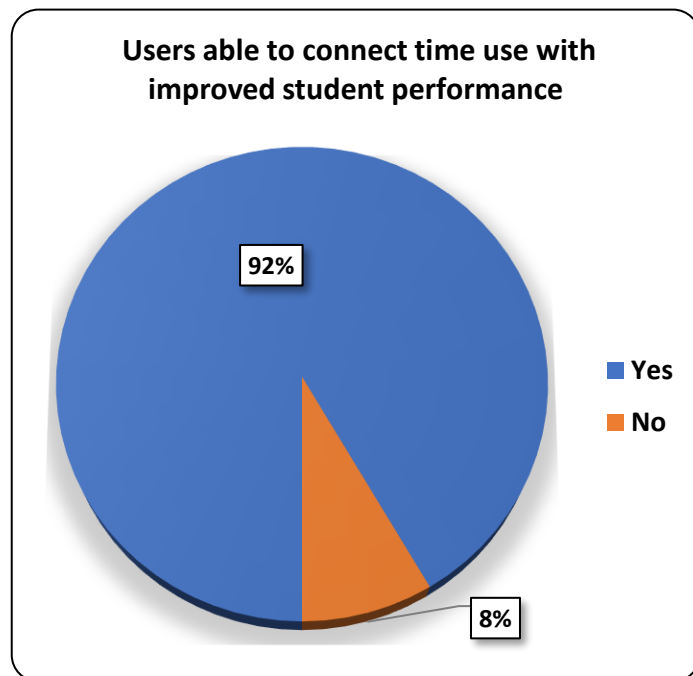

---

## Connecting Instructional Leadership with Improved Teaching and Learning

The Mission of the National SAM Innovation Project is to provide a comprehensive process and set of tools designed to develop effective instructional leaders resulting in greater student success.

The success of the SAM process is measured by the extent to which principals feel, and can demonstrate with data, that they are improving teacher practice and student performance.

- 95% of TimeTrack users and SAMs can connect their work with improved teacher practice using data.
- 92% percent can connect their work with improved student outcomes using data.

---

*The SAM process has been one of the best things I ever did as a leader. I wish I had known about it earlier. It changed the way I approached my work each day. It has kept me instructionally focused.*

*~Dr. Sonya Brooks, Principal, Maplewood High School, Nashville, Tennessee*

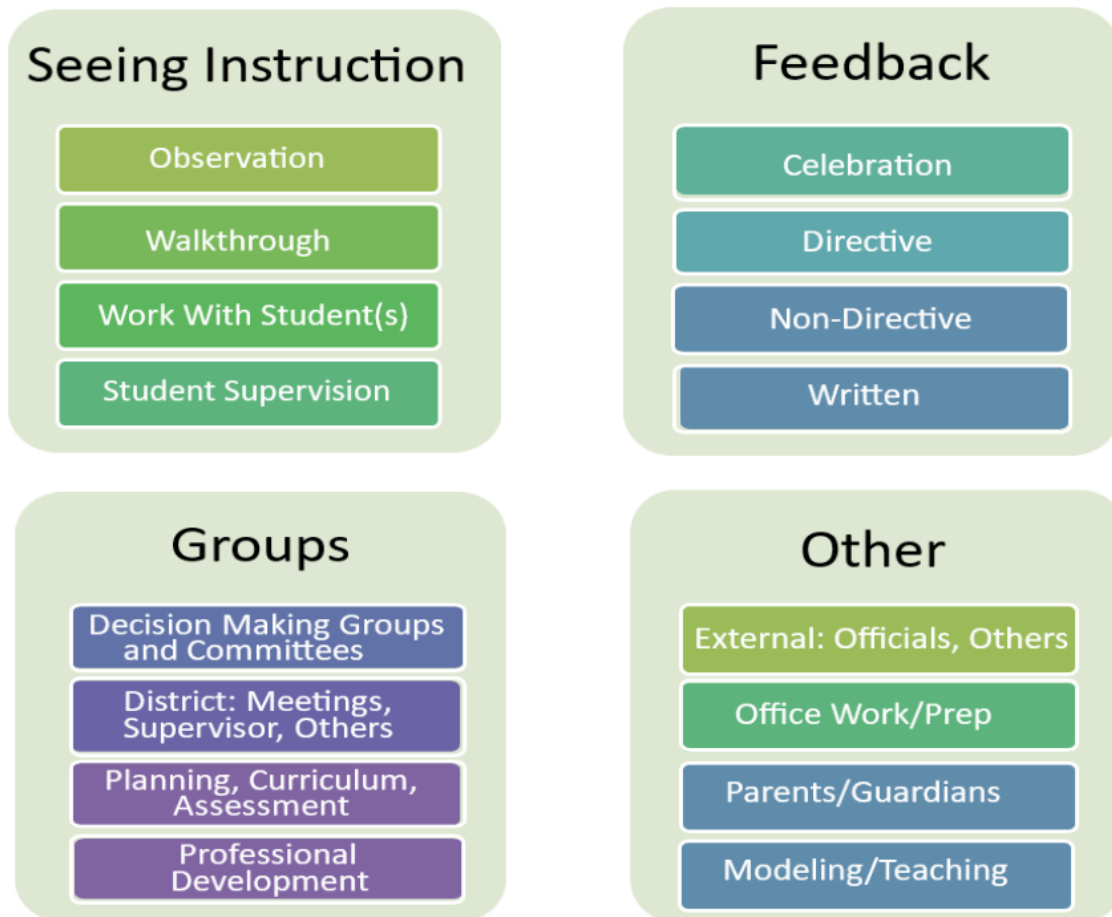

---

## Descriptors

When scheduling work, SAM teams use TimeTrack to code by **intentionality**. If the leader's intention for the event is to improve teaching and learning, a descriptor is selected and the event is associated with the teacher, other adult, group, project, or students. This gives the leader detailed information beyond the overall amount of instructional time. Data is available detailing time spent with each teacher, project and goal. Frequency of interaction and pattern of support is easily accessed in graph and chart form. TimeTrack users, SAMs and Time Change Coaches use this data to reflect on next steps and assess whether progress is happening.

TimeTrack uses 16 instructional descriptors. When scheduling an instructional event the SAM and principal determine which descriptor most closely identifies the work.

## *Instructional Descriptors*

SAM teams focus on connecting one event to another. The SAM is a staff member who meets with the principal each day to schedule work, review data, and ask reflective questions. If a principal observes a teacher on Monday, the SAM asks what follow-up should be scheduled. A good leader connects each event completed with teachers and students to the next.

---

*This experience is life altering and it has come to me at the right time in my career, allowing me to offer my best self to those whom I have been entrusted to lead. This allows me to hold myself accountable and see if I am who I say I am. It keeps me mindful about the work I am doing and allows me to reflect and see if it is benefitting us as a whole.*

*Norine Grant-Frasier, Principal, Carver's Bay MS STEAM Academy, Georgetown, South Carolina*

---

## Demographics

The Vision of NSIP is to provide SAM services in every state resulting in greater teacher and learner success.

There are 858 active TimeTrack users. Excluded from the assessment were seventy-three NSIP Time Change Coaches, trainers and administrative staff and fourteen users still in the implementation phase.

During the 2024-25 School year 171 new SAM teams were trained and successfully completed implementation; 106 new additional users applied, were approved, and successfully completed training and implementation.

## TimeTrack User Rubric Performance Assessment

| Number of TimeTrack Users at each Rubric Level                   |       |        |
|--|-------|--------|
| Rubric 1   | Count | %      |
| E (Is still working to master all elements of Rubric 1, level 1) | 70    | 9.08%  |
| 1.1 (Has mastered all elements of Rubric 1, level 1)             | 191   | 24.77% |
| 1.2 (Has mastered all elements of Rubric 1, level 2)             | 294   | 38.13% |
| 1.3 (Has mastered all elements of Rubric 1, level 3)             | 216   | 28.02% |
| Total:   | 771   | 100%   |

| Rubric 2   | Count | %      |
|--|-------|--------|
| 2.0 (Is still working to master all elements of Rubric 2, level 1) | 37    | 28.46% |
| 2.1 (Has mastered all elements of Rubric 2, level 1)               | 60    | 46.15% |
| 2.2 (Has mastered all elements of Rubric 2, level 2)               | 19    | 14.62% |
| 2.3 (Has mastered all elements of Rubric 2, level 3)               | 14    | 10.77% |
| Total:   | 130   | 100%   |

Note: TimeTrack users who mastered all elements of Rubric 1.3 were given the option of completing Rubric 2. One hundred and thirty of the two hundred and sixteen eligible TimeTrack users, 60%, elected this option.

*The school culture is so much better this year! I am more intentional with how I am spending my time, and it has had a great impact with my teachers! I am more prepared as I go to a meeting because I am utilizing my time effectively.*

*~Clint Shipley, Principal, Derby Middle School, Derby, Kansas*

**Average Instructional Time  
Rubric 1**

**Average Instructional Time  
Rubric 2**

National studies have determined principals *who do not do the SAM process* spend between 13% and 25% of their time instructionally engaged. (Grissom, Loeb, & Master, 2013, PSA, 2011)

### TimeTrack Users, Primary and Additional

| Average Instructional Time by Rubric Level                       | Primary | Additional | All    |
|--|---------|------------|--------|
| <b>Rubric 1</b>  |         |            |        |

Rubric 1**

**Instructional Time by Rubric Level  
Rubric 2**

## Rubric level by length of SAM process participation

TimeTrack users were asked three questions concerning the impact of their instructional time:

| Impact Questions   | Yes | No | % Yes |
|--|-----|----|-------|
| Users able to connect time use with improved teacher practice:     | 729 | 42 | 95%   |
| Users able to connect time use with improved student performance:  | 706 | 65 | 92%   |
| Users able to connect daily SAM work with School Improvement Plan: | 694 | 77 | 90%   |

---

*The use of TimeTrack has been a game changer for my professional growth and capacity building. TimeTrack has allowed me to really focus on the work of supporting principals. It also affords me the opportunity to reflect upon who I am spending my time with and what our focus is/has been. One of the components I truly love and am always excited about is reconciling with my SAM. She is a dynamic operator of the tool and does an exceptional job of keeping my TimeTrack updated and on point.*

*~Antwayne Sanders, Executive Director, Griffin-Spalding, Georgia*

---

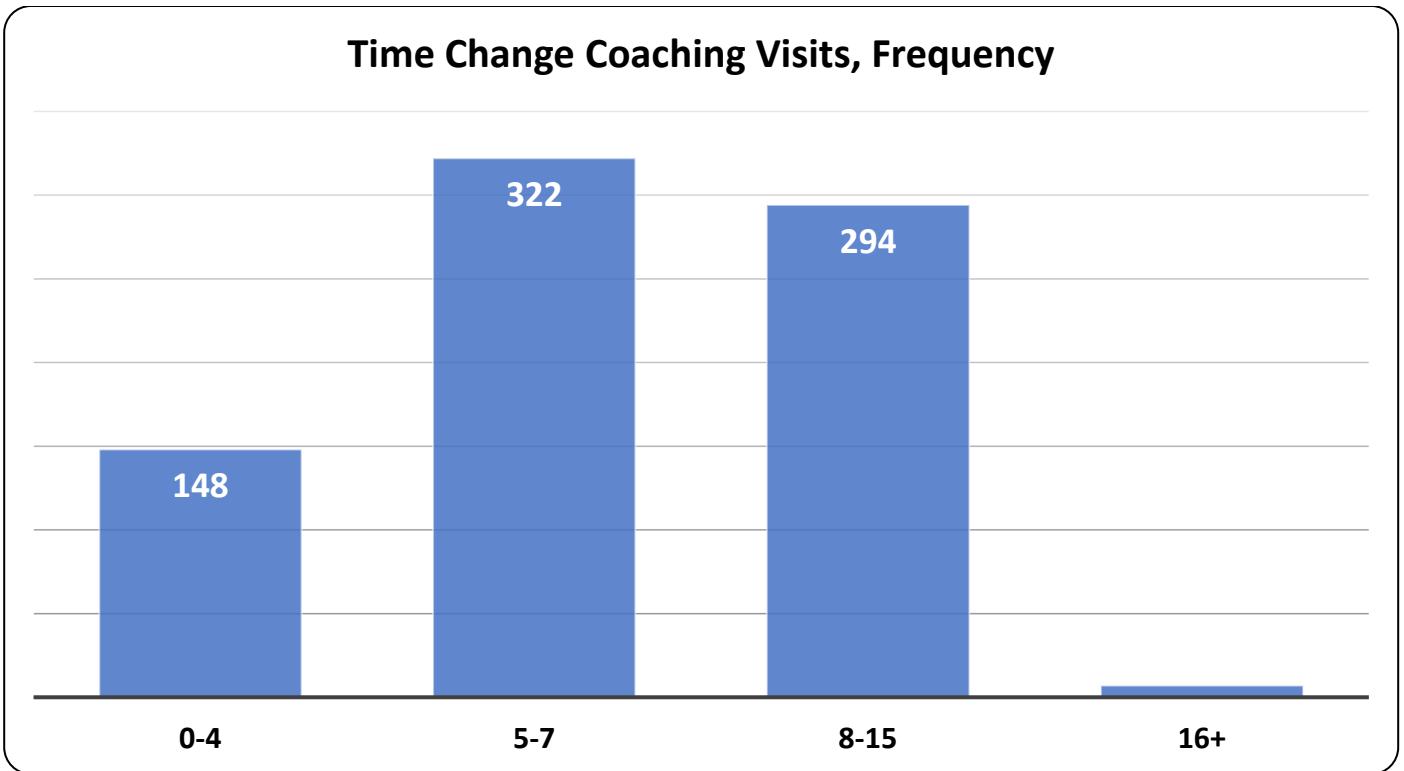

## Time Change Coaching Visits: 2024-2025 School Year

Time Change Coaches observe one SAM Daily Meeting each school month online. During this time, the coach provides support and models reflective practice questions. Time Change Coaches also review each TimeTrack weekly and provide email or phone feedback.

TimeTrack users and SAMs can request additional time with their coach throughout the school year. The average number of online meetings for TimeTrack users nationally, during the 2024-2025 school year, was seven.

| Time Change Coaching Visits, Frequency |    |     |     |     |    |     |     |     |       |

*SAMs for me has been invaluable. I see the value of the data I can clearly view. The opportunity to talk with my SAM helps me as a leader. When I look at the data dashboard, I can see so clearly the teachers that I need to work with. I've seen so much success this year because I could track the teachers and what we need to do. Once you use SAM, it is hard not to use it. Being able to set goals and track those goals has been a big part of the success we have had this year.*

*~Jimmie Bullard, Principal, Benjamin Banneker ES, Kansas City, Missouri*

*I thoroughly enjoy utilizing my SAM TimeTrack each day because it keeps me focused on the "right" work. As I focus on identified "focus teachers", I work collaboratively with my SAM each day to ensure that I provide support to all teachers. The data informs me as to whom I have seen and who I need to spend time with. I love using my SAM TimeTrack each day!*

*~LaShun Crawford, Principal, Union ES, Macon, Georgia*

*The good part is TimeTrack really does more than any other calendar to give an accurate accounting of my day and what I do with it. I love that it helps me keep track of specific data - who, when, how often, for how long, etc. It helps keep anyone from falling through the cracks. It helps me keep my goal on what is important, instruction, and what is happening in classrooms through my work with principals.*

*~Tracy Gage, District Director of School Leadership, Springfield, Illinois*

---

*I am going to recommend we expand the use of SAMS in our District. This is something I wish I'd had earlier in my career. It has allowed me to develop people around me.*

*~Tracie Swilley, National High School Principal of the Year, Fairfield County High School, South Carolina*
